Summary

Enthusiastic CSE graduate from BRAC University with hands-on experience in Software Quality Assurance, including Manual Testing, API Testing, and SQL-based data validation across Android, Web, and API-driven systems. Strong understanding of SDLC/STLC, test case design, and defect lifecycle management, with practical exposure to Agile environments. Skilled in identifying and resolving software defects through structured testing and root cause analysis. Proficient in translating requirements into effective test scenarios to ensure system reliability, performance, and usability. Committed to delivering high-quality software solutions and continuously improving testing processes in dynamic, fast-paced development teams.

Technical Skills

- **Productivity Tools:** Microsoft Office Suite (Word, Excel, and PowerPoint), Google Workspace
- **Programming & Scripting:** Python, Flask (Framework), Object-Oriented Programming (OOP) Concepts, Basic Automation Testing (Selenium – Basics), Python for Automation (Basic)
- **Software Testing & QA:** Manual Software Testing (Functional, Regression, Integration, Smoke & Sanity Testing), Test Plan & Test Documentation, Test Case Design & Execution, Root Cause Analysis, Defect Lifecycle Management, Bug Tracking & Defect Management (JIRA), Requirement Analysis & Validation, SDLC & STLC Practices
- **API & Tools:** API Testing with Postman, Jira, Trello, REST APIs, Client-Server Architecture, Browser Developer Tools, Git & GitHub Workflow (Version Control), Performance Testing using JMeter
- **Methodologies & Soft Skills:** Agile/Scrum Methodologies, Defect Analysis & Troubleshooting, Analytical Problem Solving, Risk Identification, Documentation & Reporting, Cross-functional Collaboration, Clear Technical Communication
- **Task & Workflow Management:** Backlog Creation & Maintenance, Epic & User Story Breakdown, Workflow Mapping from Requirement to Delivery
- **Database:** Relational Databases- MySQL, PostgreSQL

Education

- **Bachelor of Science in CSE** *2022 – Present*
BRAC University, Dhaka, Bangladesh
Current CGPA: 3.64 out of 4.00
- **HSC in Science** *2018 – 2020*
Govt. Science College, Dhaka, Bangladesh
GPA: 5.00 out of 5.00

Experience

- **Intern Software Quality Assurance (SQA) Engineer** *March 2026 – Present*
Truck Lagbe Limited | *Full-time*
 - Designed and executed functional, regression and API test cases for Android and Web applications, improving defect detection before release.
 - Performed API validation using Postman and SQL-based backend verification to ensure data integrity and service reliability.
 - Logged, tracked, reproduced, and verified defects using JIRA throughout the defect lifecycle.
 - Collaborated in Agile sprint activities, including requirement analysis, test planning, defect triage, and release validation.
 - Supported performance testing activities using JMeter for monitoring response behavior and system stability.
- **Former Director of Human Resources** *February 2022 – February 2026*
Robotics Club of BRAC University | *Voluntary experience*
 - Coordinated operations for 400+ members, improving communication workflows, strengthening engagement and retention.
 - Coordinated national-level competition operations, ensuring seamless execution with cross-departmental collaboration.
 - Maintained official records and authored professional communications, streamlining club documentation.
- **Former Ambassador of Marketing** *December 2021 – May 2022*
10 Minute School | *Part-time*
 - Promoted digital learning initiatives, improving student engagement through marketing campaigns.
 - Gathered participant feedback to evaluate campaign effectiveness and suggest improvements.
 - Collaborated with peers and marketing coordinators, strengthening teamwork and communication effectiveness.

Key Projects

- **Deep Unsupervised Clustering Using Non-Deterministic Neural Networks – NeuroClustIDS** 2025
Technology used: Neural Networks, Variational Deep Embedding (VaDE) model, Unsupervised Learning
The project was done for academic purpose
- **3D Gaming Project – Treasure Hunt** 2025
Technology used: Python, OpenGL, Numpy
The project was done for academic purpose
- **Machine Learning Project – Wine Quality Predictions** 2025
Technology used: Python, ML Algorithms, Kaggle
The project was done for academic purpose
- **Online Learning System – NeuralNest** 2025
Technology used: HTML, CSS, JavaScript, Python, Flask, MySQL, SDL C
The project was done for academic purpose
- **Vaccination Management System – VMS** 2024
Technology used: HTML, CSS, JavaScript, PHP, MySQL
The project was done for academic purpose

Online Programming Judge Profile

- **LeetCode** Profile Link: <https://leetcode.com/Rajin50>
Problem Solved 150+
- **HackerRank** Profile Link: <https://www.hackerrank.com/profile/rajin50>
Problem Solved 70+

Certifications

- **SQA: Manual & Automated Testing** 2026
Certification Course by OSTAD
- **Software Engineer Intern** 2025
Certification Test by HackerRank
- **Software Engineering Pathway** 2024
Arranged by BOHUBRIHI
- **Basic of Robotics** 2023
Arranged by Robotics Club of BRAC University
- **Basic of Linux** 2023
Arranged by Robotics Club of BRAC University

Awards

Duke of Edinburgh’s International Award 2023
Bronze Award
Recognized for leadership, teamwork, perseverance, and community service through diverse skill-building, physical, and volunteer activities.
